Vienna was a laboratory for Modernism at the turn of the 20th century. In arts, literature, music, architecture, product design, the sciences and psychology; it's main protagonists were Otto Wagner, Egon Schiele, Gustav Klimt, Kolo Moser, Gustav Mahler, Sigmund Freud and Arthur Schnitzler. The year 1918 proved to be a watershed. This year didn't just see the end of the First World War but also a transformation of Vienna from the royal seat of the multinational Austro-Hungarian Empire into the capital of small German-Austrian Republic – it was also when four of the artists shaped the Vienna of 1900 – Schiele, Klimt, Wagner and Moser – passed away.
